

YEAR 11 MATHS INTERVENTION

As part of our ongoing programme to support your child to achieve the best grade possible in maths, we are eager to provide extra tuition after school on a Tuesday night. Our plan is that we will target students aiming for a similar grade and provide compulsory lessons that compliment classroom teaching and focus on areas where your child needs further support. Indeed these are not revision sessions – they are booster sessions.

Regularly we will evaluate the needs of Year 11 and amend the list of pupils, depending on their need and the topics being addressed. We will of course keep you informed of times/ dates when we require your child to attend.

The initial booster programme **requires your child to attend from 3:05-4pm starting Tuesday 29 September in the Main Hall.**

We do expect all pupils invited to attend but also realise that students may have appointments, etc. already booked. If this is the case then pupils must communicate this with their maths teacher before the start of the session. There are sanctions for students who do not attend and have not been to see us before the session. We do not expect to have to use these as this is to support pupils learning so please support us with this.

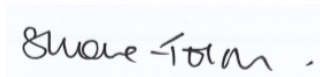

Failure to attend intervention when invited:

If students don't attend they will be issued with *2 half hour lunchtime detentions – this makes up for the hour that they have missed.

If students don't turn up to the lunchtime detentions then they will go to connect for a day.

Failure to attend *3 interventions then this is passed to Mr Fieldhouse and Mr Miller who will invite parents in.

Regards

Ms Tolson
Subject Leader Maths
